

# 1160 Series Fatboy Beacon

## Key features

- aae Sigma 2 bi-directional spread spectrum technology
- User configurable Tx power and Rx Gain
- Multi-Fire common interrogate capability
- Quick, easy configuration
- On-board fast charging for typical 8 hour charge time
- Survival depth to 4000 m as standard

## Applications

- General purpose tracking and positioning applications for deeper water applications or in an acoustically challenging environment
- Static and dynamic operations e.g. Deep water ROV, subsea cable burying applications

## Fatboy Series Beacon Overview

The 1160 series Fatboy Beacons are ideal for deep water operations, noisy and acoustically challenging environments, and applications requiring long operating ranges.

Fatboy transponders incorporate applied acoustics' proprietary Sigma acoustic protocols, allowing extremely stable and reliable performance with Pyxis and Nexus USBL systems, whilst maintaining compatibility with almost all of the industry's other standard USBL systems.
